

Internet

This home is equipped with high speed internet access throughout as well as in the Patio and Pool Area.

SSID: LCGVILLA

This network transmits on both 2.4 and 5ghz frequencies. 5ghz is better for high bandwidth activities such as streaming video but has a shorter distance capacity from the router.

To connect to the LCGVILLA network simply select it and when prompted for the password enter luxcgvilla all lowercase.

Should you experience issues with the Internet the router and modem will automatically attempt to resolve the problem by rebooting themselves. If you still have no internet after 30 mins there are a few things you can do to troubleshoot prior to contacting Vacation2Florida.

First check if you have internet connectivity from other devices.

Check whether you have Telephone and Cable TV as all services are provided by Spectrum Networks via the same fiber cable. Providing this information to Vacation2Florida will assist in getting the right Spectrum team onto the problem.

In most cases Vacation2Florida are able to remotely resolve the problem within 30 mins.
