

P

Pest Control

This home is fitted with a built in Pest Control system and regular spraying of the home takes place. Whilst all possible measures have been taken to ensure the home remains bug free in the warm Florida climate it can prove difficult to control all the bugs who will try to find there way into the home.

To help prevent excessive bugs please ensure all trash is placed inside the Trash bin (see Trash section) and that you do not leave food lying outside in the Patio area.

Should you encounter excessive bugs inside the home please contact Global Resort Homes on (407) 387 3030 who will send round the Pest Control ASAP.
